

Common Procedure Charges

Below are averages of common surgical and ancillary charges at Cypress Pointe Surgical Hospital. These averages are updated quarterly and are based on the patient charges actually incurred for these services during the previous twelve months. They may be used by patients to estimate the charge for services that they may incur.

Please notice that these are only estimates and are subject to change without notice. The actual cost of your procedure may be higher or lower based on factors specific to your case, such as your length of stay in the hospital and the complexity of your medical condition.

What you are charged is not what the hospital will be paid. That depends on your insurance plan and what contractual relationship the facility has with your plan. If you have any questions regarding the hospital pricing, please contact (985) 510-6200.
